

THE GIVE-FIRST TEARDOWN

The Local Visibility Teardown

Where your business is invisible on Google, the benchmark to hit on each surface, and the three fixes that move the needle first. Real, and yours to act on today. No call, no pitch.

5 surfaces that decide the call

1 hour of highest-leverage work

3 fixes, in order

A search is not one list. It is a stacked page, and you are on it or you are not.

When someone searches "best CPA in [city]" or "roof repair [zip]", five surfaces decide whether you get the call. Most owners obsess over one (their website) and lose on the other four.

44%

of clicks go to the top 3 of the map pack.

Businesses inside the three-pack draw well over double the calls and direction requests of those ranked 4 to 10. Outside the top three, most searchers never scroll far enough to find you.

1 The map pack. The box of 3 with the map, stars and Call buttons. The most valuable real estate on the page.

2 Google Business Profile. The free listing that powers your map-pack spot. The engine, not a side detail.

3 Reviews. Rating, count and recency. They decide both your rank and whether anyone clicks.

4 Local organic. Service and city pages below the map. A thin website quietly loses here.

5 Your website. You can win 1 to 4 and still lose the lead in the last ten seconds if the site is slow or hard to call from a phone.

HIGHEST LEVERAGE

The Google Business Profile checklist

Almost always the fastest, cheapest win. Hold yourself to this standard. If you are missing three or more, that gap alone is likely keeping you out of the map pack, and it is fixable in an afternoon at zero cost.

Claimed & verified

Verification takes days. Start it today.

One precise primary category

+ every relevant secondary. A top ranking factor.

Every service listed individually

Each as its own line, not one vague paragraph.

20+ real photos

Team, trucks, before/after. Not stock. Add a few monthly.

Accurate hours & service area

Including holidays. Wrong hours send buyers away.

A Google Post in the last 30 days

Plus a seeded Q&A. Most competitors skip both.

The benchmark

A complete profile: verified, one precise primary category, every service listed, 20+ real photos, accurate hours and area, and at least one Post in the last 30 days. Six boxes. Hit all six before you spend a dollar on ads.

REVIEWS

You can rank and still lose the call

Reviews do two jobs: they help you rank, and they decide who gets picked once you appear. Volume and recency beat a slightly higher rating with almost no reviews.

WINS THE CLICK

4.7★

180 reviews

Volume signals trust. Recent reviews signal you are still active.

vs

LOSES

4.9★

11 reviews

A near-perfect rating no one trusts because there is no volume behind it.

Your three benchmarks

Rating · hold 4.5★ or above

Volume · match or beat your top-3 map-pack rivals

Recency · several fresh reviews every month

IF YOU ONLY DO THREE THINGS

The three fixes that move the needle first

In order. Each one compounds the next.

1

Complete the Google Business Profile to all six benchmarks

The single fastest path into the map pack. Free, and doable this afternoon.

Effort: 1 afternoon

Impact: highest

2

Start a steady review engine

A simple, repeatable ask after every job. Aim to pass your top-3 rivals' review count, then keep a fresh trickle.

Effort: a 2-line system

Impact: high

3

Give each core service its own page, fast to call from a phone

Google cannot rank a page you never wrote. One-tap call button above the fold, loads in under 3 seconds on mobile.

Effort: a few pages

Impact: compounds

THE PERSONALIZED VERSION IS ON ME

Want the teardown for your business?

Send your business name, your city, and the 2 to 3 services you most want more calls for. I will write up exactly where you are leaking demand: the searches where you do not show up, who sits above you in the map pack, and the three things I would fix first for you. No call needed unless you want one.
